16 th January	Kenneth & Fergal O'Brien, Knocknastooka, Grange, Co. Waterford	P36 XD68

TODAY'S CALVES, TOMORROW'S HERD

– how to maximise calf health for long term profitability

What topics will be covered at these calf events?

Johne's Disease - Johne's disease is a challenging condition with multiple factors associated with its spread between and within farms. Find out more on the management and control of Johne's disease.

Calf Housing - Good calf house design is critical for calf health and growth. You will get tips on design and layout which should be considered when building or renovating a calf shed.

Labour Efficient Calf Management - how to feed calves in a well-organized manner without compromising animal health.

Disinfection Protocols - Want to reduce animal health costs and the amount of time you spend on treating sick calves? Implement our best practice on disinfection protocols for equipment, personnel and calf accommodation.

If you want to learn more about any of these topics, come along to one of the Teagasc/Animal Health Ireland CalfCare Open Days in conjunction with Glanbia and supported by Volac.
