

## CELLCHECK ON-FARM EVENTS 2022

# DRY COW THERAPY STEPS FOR SUCCESS

Most spring calving dairy cows are dried off between October and mid-December. Animal Health Ireland in partnership with Teagasc and in conjunction with the dairy processors and the Department of Agriculture, Food and the Marine are running a series of on-farm events in October.

The purpose of these events is to showcase best practice around drying off and assist farmers with selective drying off strategies in light of changes to the legislation with regard to the use of antibiotics.

**THE LATEST ON  
SELECTIVE DRY COW THERAPY**

**STEPS TO IDENTIFY COWS  
SUITABLE FOR SELECTIVE DRY OFF**

**NUTRITION OF THE COW  
AROUND THE TIME OF DRYING OFF**

**WHAT THE CHANGES IN  
LEGISLATION MEAN FOR YOU**
